If we sow the wink we shall reap the whirlwine. The theories taught by Senators Hoar and Lodge, by Beed and McKinley will as surely lead to such outbreaks as those we witness to-day, as will the sowing of wheat bring the harvest of bread.

Protection as failed to give the steady with the same point of the same proposed, but why would Hoar and Reed stop with that? Why not do for them what was done for sugar-planters and ship-owners, and what Mr. Morgan and others propose to do for Warner Miller's ship canal in Neargus?

The danger, the sole danger, in this culturak is that it is entirely logical.
But the soler second thought of the American people will right it all. They have been tolerant of folly, but they are not fools. Relief is not to be found in the way suggested by Mr. Coxey; it is only another wrong added to wrongs in-unenable. We must turn about and divorce Government from all business and all ludustry, saying to Coxey and Quay, to pronoters of the Nicaragua ennal and service pension hills, that the Government depends solely on the people for all it has or can have; that it cannot create work any more than it can create money, and that the only way an ann can earl rowal in yellow for the Government to give man con earl rowal is by the west of his brow. Every clitteen must care for himself and then for the Government, and not look for the Government to give him work or bountle for a shadden of any kind.—Louisville Foot.
